二维各向异性双温模型 初步测试结果 (HOPG)

左边的图是为了方便显示融化区域而作的。红的表示融化区域。右侧图是温度。采用了柱坐标系。横轴是 \mathbf{r} ,纵轴是 \mathbf{z}

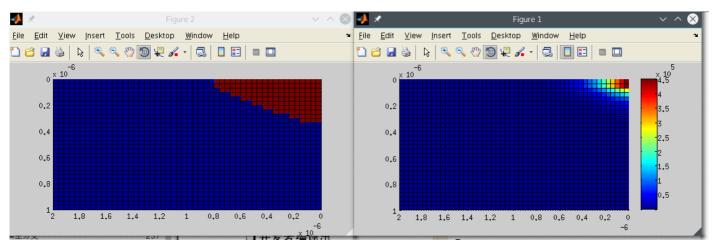

dE=1keV. 融化半径 r=1nm

dE=10keV 融化半径 r=4nm

dE=100keV 融化半径 r=7.5nm

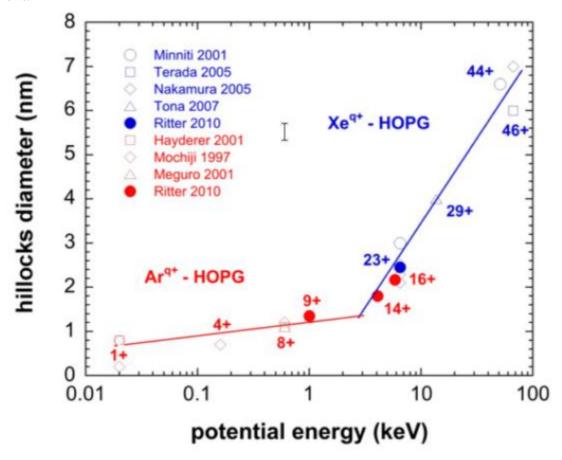

Figure 17. Hillock diameter as a function of potential energy for various HCI irradiations of HOPG observed by STM. Data taken from [104, 108–114].

计算结果和实验数据符合比较好。因为可调参数太多。主要是调出来的。 附上一张三维图
